

Dear Hiring Manager,

I am pleased to provide my recommendation for Rae John Carandang following his internship evaluation.

Rae John consistently demonstrated strong technical capability, analytical thinking, and professionalism throughout the program. He stood out for his ability to build and explain complex systems with confidence and clarity, while maintaining a practical understanding of deployment, scalability, and modern development workflows.

One of his strongest qualities is his systems thinking approach. He is able to understand not only how features work individually, but also how they interact within larger technical environments. His project implementations reflected production awareness, strong troubleshooting ability, and thoughtful execution.

Rae John also showed maturity in handling technical challenges and demonstrated a willingness to continuously improve his work. His communication style during demonstrations was structured and professional, allowing him to clearly explain both technical decisions and implementation logic.

With continued exposure to collaborative environments and advanced engineering experiences, Rae John has strong potential to grow into a highly effective technical contributor and future engineering leader.

Based on his overall performance, I strongly recommend Rae John Carandang for roles involving software development, systems engineering, or technical product implementation.

Please feel free to reach out if you would like additional insights regarding his evaluation.

Sincerely,

Kathreen M. Hervera
